DEVELOP STRATEGY

We have a 3-year strategic refresh due.

05 May 2026 · 14 minutes · Strategy is drifting and nobody wants to say it

---

PRIMARY DIAGNOSIS

Three scenarios are credible. Scenario A — keep the current strategy and double down on cost discipline.

Scenario B — partial pivot toward services revenue, capped at 15% of group capex. Scenario C — full divestment of the underperforming segment and a focused services bet.

SCENARIOS

Scenario B — partial pivot toward services revenue··· 61% (53–69%)

capped at 15% of group capex.

Scenario A — keep the current strategy and··· 28% (13–43%)

double down on cost discipline.

Scenario C — full divestment of the underperforming··· 18% (3–33%)

segment and a focused services bet.

What would change this read

If the assumption that scenario c — full divestment of the underperforming··· no longer holds, the 18% read would move materially.

RECOMMENDATIONS

- **Recommendation 1** — Commission the cash-flow stress test by the next board cycle.
- **Recommendation 2** — Brief the chair on the Scenario B scope-cap before committing to capex.
